

The Maximus.

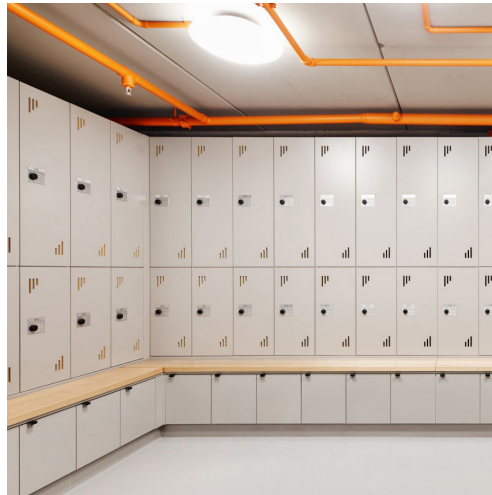

Spec Sheet

Five
At
Heart

Official Patent and Design Numbers (either pending or granted)
Australian patent no. 2015100050

Have a seat without losing storage space.

**Five
At
Heart**

Maximus.

Product Performance

876mm and 976mm hanging heights ensure garments have sufficient space to hang properly. The hanging section of the lower locker extends behind the bench seat, allowing this standard hanging height to be maintained.

A full-width hanging rail allows multiple garments to hang comfortably.

The shoe storage is integrated into the bench seat to maximise storage efficiency while providing a strong and sturdy bench.

The shoe storage is recessed into the lower locker to accommodate a door, concealing the shoes for a clean, tidy appearance without reducing the locker's hanging space.

A small, easily accessible personal shelf keeps wallets, phones, and keys within quick reach.

Coat hook on the back of the locker door provides additional hanging space.

Material

Bench Top: Solid Hardwood **OR**
Laminated MDF (with extensive colour range)

Laminated MDF door (AUS: E0 MR)
(with extensive colour range)

White particleboard carcass (AUS: E1 MR)

Moisture resistant base with black finish

Specification

(Z) Locker Width : 300 or 400mm

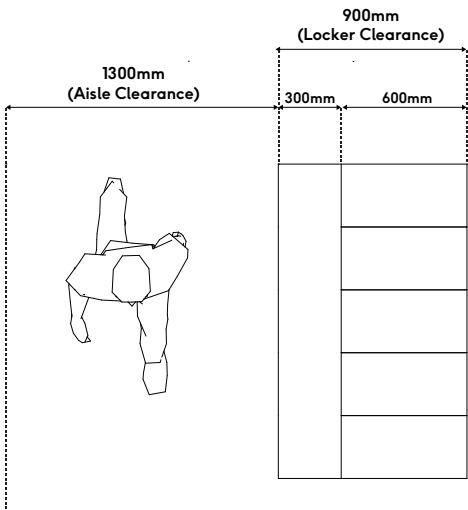

Front Door Vents (Optional)

Choice of locking system

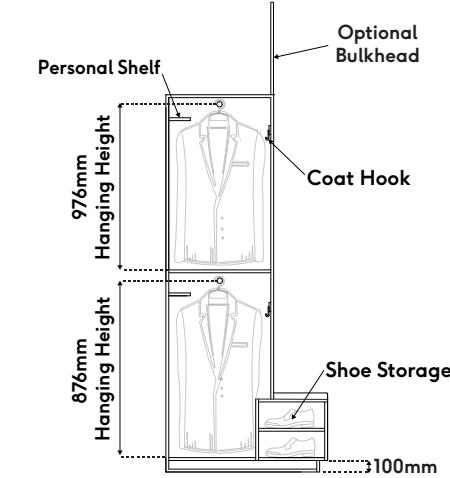

Bulkheads available at additional cost

Maximus (3 Tier).

Product Performance

Only the bottom locker compartment can retain dedicated hanging space, with the hanging section extending behind the bench seat.

The top locker is now split into two smaller box lockers, which are **not** for hanging garments but can be used for bags and smaller belongings.

While this option is great for increasing locker capacity, the primary purpose of lockers within changing rooms is to hang and store garments. For this reason, we recommend that a minimum of 85% of lockers within changing rooms provide garment hanging.

Two shoe storage compartments are integrated into the bench seat to maximise storage efficiency while providing a strong and sturdy bench.

Maximus Warranty and Technical Data

Warranty Information

Five At Heart's Maximus II comes with a standard 7 year warranty, effective from the handover date.

For the warranty period, we warrant that the equipment (and any materials) we supply will comply with the relevant standards at the date of installation.

This warranty is limited and may be excluded in part or in full in light of user damage or failure to install to Five At Heart specification.

We recommend a monthly visual inspection for signs of damage or need for cleaning.

Contact Five At Heart in the event of product damage.

Disclaimer

Images may differ from actual product and specifications may change without prior notice.

Manufactured to metric dimensions.

Installation Requirements

AUS: Lockers/auxiliary units require a minimum of 16mm at the end of each nib wall for filler panels and 50mm for corner fillers.

UK/Europe: Lockers/auxiliary units require a minimum of 25mm at the end of each nib wall for filler panels and 50mm for corner fillers.

Fig 1 This configuration maximises locker capacity. However, please note that where the corner lockers overlap, those two lockers lose their dedicated shoe storage.

Fig 2 To avoid losing the dedicated shoe storage in the corner lockers, consider this alternate installation instead.

Maintenance Requirements

If any moving parts appear to be malfunctioning, discontinue use and contact Five At Heart.

Cleaning

For general care and maintenance, simply wipe away most spills or marks with a damp cloth, or wipe clean with non abrasive household cleaner.

Do not submerge product at any point.

Avoid scourers and abrasives as they will damage the surface.

Do not use waxes or polishing products as they dull the natural shine.
